## WHOAMI

Having worked in international teams, I was not only able to gain valuable knowledge, but also benefit from the different perspectives and working methods of my colleagues. The exchange with other developers has broadened my skills and shaped my approach to mobile development. I am convinced that collaboration and shared learning are essential

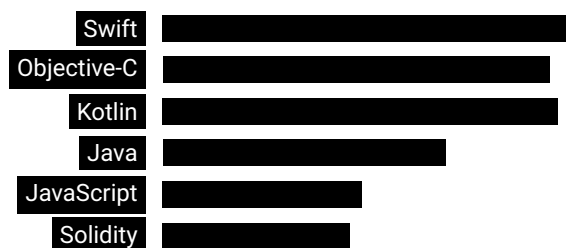

to find innovative solutions and to continuously evolve.

In addition, I am passionate about the possibilities that Kotlin Multiplatform offers. By using this cross-platform technology, I can write efficient and scalable code that works not only on Android but also on iOS devices.

## SKILLS

My main expertise includes iOS development with Swift, UIKit and SwiftUI as well as Android development with Kotlin, XML Layout and Jetpack Compose

Moreover, I have extensive experience with agile project methods and tools. I have worked in agile teams and am familiar with methods such as Scrum and Kanban. For efficient project planning, task management, and communication, I am proficient in tools such as Jira and Confluence. These tools enable smooth project coordination and organization.
